Product Name :

Digital Point Load Test Apparatus

Product Code :

SLE/CE/106

Description :

Specification:

- Digital Point Load Test Apparatus consists of a 60 kN capacity load frame with a hydraulic loading ram driven by a hand pump.
- A ruler assembled on the frame allows the direct measurement of the distance between the conical platens before and after the test.
- The frame is adjustable for testing of samples up to 102mm diameter.
- The compression load is measured by a pressure transducer connected to an advanced digital display unit assuring the best accuracy and resistance to the failure shocks.

Features:

- **Load range** : 0 – 60 kn
- **Digital display** : 2 x 16 characters
- **Resolution** : 32.000 div.
- **Accuracy** : $\pm 1\%$
- Load pacer included.
- Load measurement in both kn and mpa.
- Serial port for pc connection.
