Description :

TECHNICAL SPECIFICATIONS:

Portable baby/child/adult length-height measuring board is used to measure:

- a) Recumbent length of a baby up to 24 months old, or from a minimum length of 8cm
- b) Height of an adult and a child aged 24 months and up in vertical position.

Has a firm, flat surface.

Long-lasting hard-wearing measurement scale is fully integrated with the device and is easy to read in low light conditions.

Orientation of numerals on the measurement scale: parallel to the board, facilitating quick and easy reading of results (refer to the picture attached below).

Measurement scale is made of metal or another material with equivalent stretch and tear resistance characteristics.

Unit of measure: centimetres

Smallest graduation: 0.1cm.

Fold-up mechanism and low weight make it compact and easy to transport.

Parts are not lose or shaking during transportation.

Panels are secured with self-contained, spring loaded bolts.

Carrying when collapsed is facilitated by an integrated handle at point of equilibrium and/or removable shoulder/back strap/s.

Fixations of the shoulder/back strap/s on the board do not hamper horizontal set-up from lying flat.

Simple and fast set up, no tools (screwdriver, etc.) required.

No need for calibration, as all parts has prefixed position.

Full measurement range with two extensions: 0 to 204cm

Measurement range with one extension only: 0 to 142cm.

Accuracy: ± 0.2 cm

Precision: ± 0.2 cm

Width of the board: ca. 25cm.

The device has:-

a) A large foot/head piece which provides a stable base for vertical set up and is used as head board for horizontal set-up, and

b) A smoothly gliding measuring slide/wedge.

Smooth finishing allows easy cleaning and safe use.

Designed for heavy duty use in demanding circumstances.

Durable, resistant to effects of excessive humidity and high temperature, water splash proof and shock resistant.

Measuring slide/wedge can be locked or has some kind friction feature to assure accurate and precise measurement.

Measuring slide/wedge wobbles maximum about 0,2 cm. over full length, allowing repeated accurate reading.

Exact points where to read are clearly marked with pictogram or arrow on the measuring slide/wedge.

No sharp edges or corners.

Board can is made of light, strong, durable material, resistant to the conditions described above.
