Product Name :

Conductivity of Metal Apparatus

Product Code :

SLE/H/28

Description :

Strips of copper, brass, steel and aluminium mounted on a wooden ring and meeting in the centre.

Rates of conductivity in the different metals can be compared by the difference in time taken for each cup of wax to melt.

Gentle heating at the centre melts wax placed in the hollows at the end of each strip.

Contact Science Lab for your Educational School Science Lab Equipments. We are best educational scientific lab equipments, educational scientific labs equipments, engineering educational equipments, engineering educational equipments in india, engineering educational lab equipments, engineering equipments suppliers.
