**Product Name :**

Aerometer (densitometer) for liquids with  $d$  less than 1

**Product Code :**

SCI-877/012

**Description :**

**DESCRIPTION :-**

Measuring density for liquids heavier than water.

Measurement range 1000-2000 kg/m<sup>3</sup>

Density value can be showed by one procedure; repeatedly continuous rapid measurement can be worked.

Digital display; High accuracy of measurement; Simple operation; Stable and durable.

Density value of samples with temperature from normal to 100 centigrade can be measured.

It is very easy to clean measurement cup, and can't got the limitation of the size of pycnometer caliber.

Adopt completed windproof and dustproof cover, which makes the structure convenient and durable.
