**Product Name :**

Newton's Tube (5x105)

**Product Code :**

SCL-293/04

## Description :

### DESCRIPTION :-

- It consists of a vacuum tube where we throw a feather and a piece of metal.
- Dimensions (5x105) cm, weight 0.7 kg.
- The diameter of the five steel balls is 19 mm, hanging from a chrome-plated steel frame.
- Through demonstration we see that for every action we have an equal but opposite reaction to the action.
