**Product Name :**

Laboratory Mills

**Product Code :**

SCI-302/05

## Description :

### DESCRIPTION :-

- Steel cutting edges on the knives allow milling of a wider range of material, including plastic, animal feed, bones, cables, cardboard, electronic scrap, feed pellets, foils, food, leather, material mixtures, non-ferrous metals, paper, pharmaceutical products, refuse derived fuels, rubber, waste, woodOptimal for medium-hard, brittle, temp-sensitive and moist
- Minimum sample quantity 0.1 ml
- Final fineness of 5 to 10Micrometers
- Precise microprocessor control
- Variable cutting speed
- The laboratory mill we offer is used for preparation of samples for analysis with minimum loss of moisture of volatile constituents.
- Weight distribution and balancing of rotating parts has been adjusted to provide greater stability and quieter
