## Description :

### DESCRIPTION :-

- Bridge rectifiers, double wound transformers with good quality enameled copper wire and high-grade laminations minimize losses while ensure continuous trouble free operation over prolonged use.
- Multiple tapping output selectable through rotary switch with positive click stops.

### Features :-

- Color coded safety sockets.
- Safety socket for earthing.
- Rigid ABS construction.
- Stackable housing.
- Ergonomic feet.

### Technical Specifications :-

- **Input voltage** : 110v – 220v AC (Selectable)
- **Frequency** : 50-60Hz Fuse (Primary): 0.5A
- **Output voltages** : 2-12V DC, with a step of 2V
