Product Name :

Digital Heating Mantles

Product Code :

SLE/LHM/03

Description :

These heating mantles are made of rolled aluminium body.

The heating element is flexible, insulated and anchored securely in glass fabric.

Heating mantles are used to uniformly heat various round bottom glassware vessels such as flasks, by placing them directly on the heating element without substantially increasing the risk of glass shattering.

PID microprocessor controller provides precise temperature regulation of external probe.

Includes external temperature probe, support rods and clamps.

The temperature of heating element can go upto 350°C.
